## **Introduction:**

Umcebo Sonke Group is a bulk manufacturer of uniforms that delivers NATIONWIDE. We cater for all industries for a minimum order of 50 items (negotiable if order is continuous) to unlimited. We pride ourselves in our ability to bring our clients vision to life, as we are aware of the importance of uniform, as it forms part of, and expresses the identity of any institution.

Our products range from golfers, jackets, skirts, jerseys, tunics, overalls, worksuits etc. The uniforms we manufacture are also printed inhouse.

Our printing includes sublimation, embroidery, screen printing and heat press. The aforesaid is only limited to uniforms manufactured ourselves.

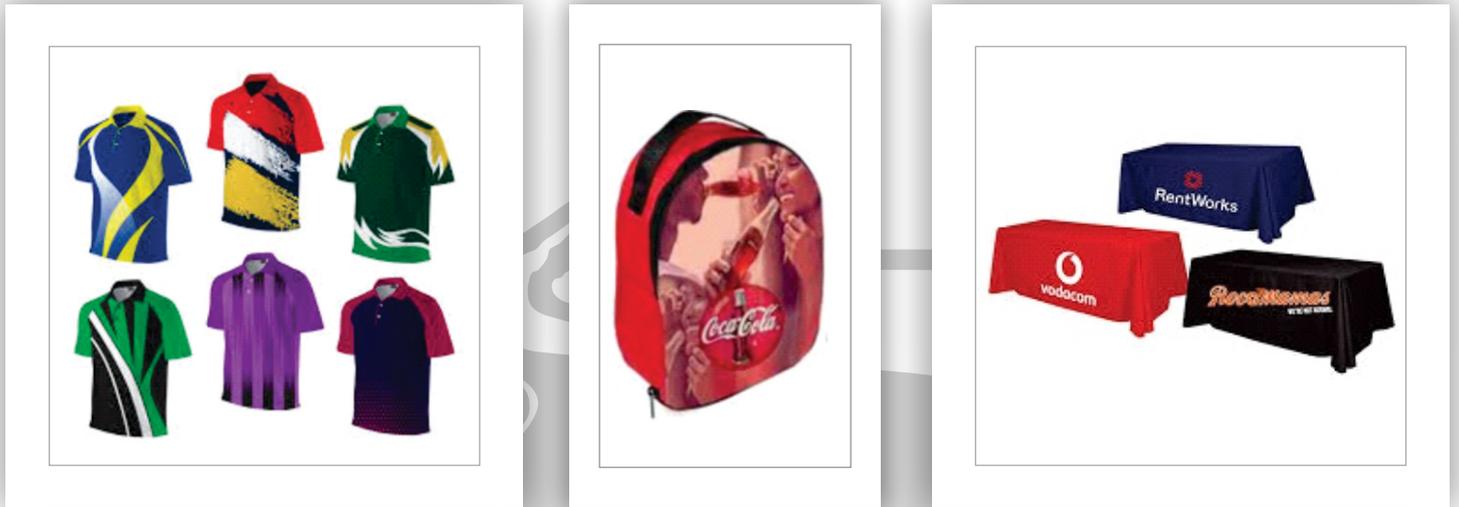

Our consistent growth emanates from our ability to adapt as a company to ever changing times. Since the inception of the company, we have manufactured uniforms for various industries such as school uniforms, security company uniforms, restaurant uniforms, church uniforms, construction uniforms etc.

## Sublimation:

We have recently introduced sublimation printed products into our range and it has been well received by schools in South Africa. (see below)

Sublimation is not only limited to jackets above, but also to various other items (see below)

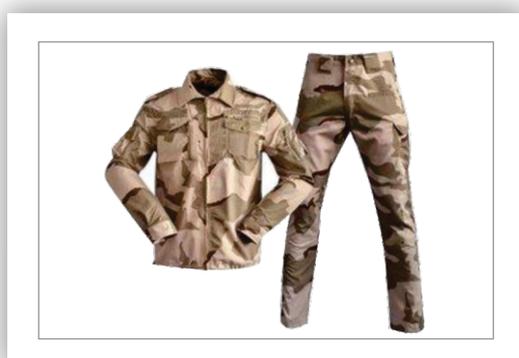

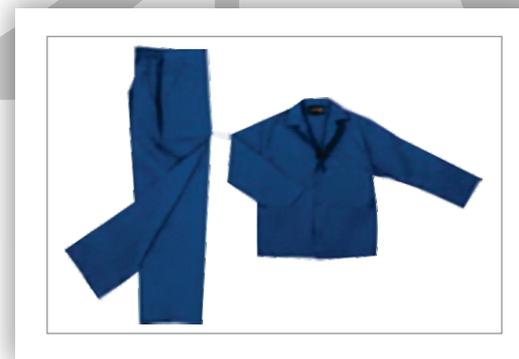

## Why Choose us?

We manufacture garments ourselves and are thus able to offer you with custom goods tailor made to your institution in any industry at bulk scale. We are therefore unlimited to material, colour and design when it comes to fulfilling client's orders. Our processes is fast and efficient which emanates from our combined experience of over 15 years in manufacturing for bulk supply.

## Our process:

We physically consult or call client as we require that client provide us with a description of the requested goods. A sketch of the goods is drawn and furnished to our graphic designers who do a digital design. The digital design is furnished to client for confirmation and any amendments. Upon confirmation, we proceed to manufacture a sample for the client for approval. Upon approval of the sample, we proceed to manufacture the final order.

Below are some of the goods that we manufacture:

## Interesting facts:

In 2020 when COVID halted business operations, we were actively involved in the production of cloth masks due to the deficit of surgical masks at the time and played our part in controlling the spread of COVID. (see below)

## Cloth Mask Production:

# #MASK ON!

## Production Output:

We produced 500 masks per day during COVID.

## Our Mask Specifications:

All our masks were 3 Ply- 2 cotton outer layers and 1 polycotton inner layer that easily dried up. Our masks were designed to prevent up to 5microns of droplets from entering or exiting the mask. The inner polycotton layer fit 120mm by 100 mm (removability optional during design stage). We ensured that the masks were breathable and did not block more than 10% inflow and all sizes were available.
